**PS465025A**

*Daisy chain; DIN*

### AS-Interface power conditioner

The AS-Interface power conditioner converts any 30VDC power source to an AS-Interface power supply by providing the data decoupling function. It may be used to power an AS-Interface segment with redundant power supplies or with remote placement of power supply.

This device can be used for

- Redundant power supplies for single AS-Interface segment
- Remote location of power supply (distance from power supply to power conditioner does not add to AS-i network length)
- Power multiple segments with 1 power supply

Specifications	
Connection	Redundant inputs (diode protection) Daisy chain inputs (common terminals)
Max voltage	35 VDC
Max current	3 amps
Input voltage	26 VDC to 32 VDC
Indication	Green LED indicates bus power is good ( $\geq 26V$ ) Red LED indicates bus power is low ( $< 26V$ )
Dimensions (L, W, H)	75mm, 26mm, 40mm
Operating temperature	-40° to +80°C (-40° to +176°F)
